

The call for international mobility for researchers in pills.

The aim of the call is to attract researchers to South Tyrol and to foster local researchers to acquire new skills abroad.

The call is launched once a year.

Deadline 3rd May 2023 at 16:00 CEST Brussels time

How does it work?

The aim of the mobility is to develop a research project, while being hosted by a research institution. The project can last **minimum 6 months and maximum 24 months**. 60% of this time must be spent at the hosting institution. The rest 40% can be done in your institution or elsewhere.

The project must however end within 31.12.2025. In case of impediments, this deadline can be then postponed, but in any case, it must be approved.

Incoming researcher (TOWARDS South Tyrol) must have a Phd AND at least 10-year research experience (or just 8-year experience in case of women researchers); furthermore he/she must **not** have lived in the Euroregion Tyrol-South Tyrol and Trentino in the last 12 months prior to the date of submission. However, you can also apply, in case you already are IN South Tyrol as incoming researcher through European, national or provincial measures such as Marie Skłodowska Curie (MSCA) programme or a Seal of Excellence grant from the Province of Bolzano.

Outgoing researcher (FROM South Tyrol) must have a Phd OR at least 4-year full time equivalent research experience; he/she must be affiliated to a research center based in South Tyrol, i.e. he/she has had a scientific collaboration with the research center, which has not expired for more than 180 days prior to date of submission. Furthermore, the researcher must have developed research activities in South Tyrol for at least 36 months in the last 10 years.

Both in case of incoming and of outgoing researcher, it is **the research institution based in South Tyrol which will submit the request for funding**.

The budget is split into 4 parts:

- living allowance (part A: max 5.100 euro/month, can be increased to 6.600 euro in specific cases),
- mobility (part B: max. 1000 euro/month),
- project costs (part D: max 600 euro/month),
- management costs (part E: max 400/month).

Each part has a maximum rate pro month. In case the researcher moves with her/his family, a lump sum of 250 euro more pro month (but not pro relative) can be added.

At least 3 months will be necessary to evaluate the requests, also depending on their number.

Within October, the ranking list of the approved projects is usually published.

We suggest you planning your mobility so that you can start your project next year, in 2024.

Please note, researchers cannot apply themselves, but they must be introduced by a research organization based in South Tyrol, which should also help them to prepare the project proposal and, in case of success, to arrange their mobility and to support the project development.

The main research centers in South Tyrol are:

[Free University of Bolzano](#)

[Eurac Research](#)

[Laimburg Research Center](#)

[Fraunhofer Italia](#)

[Eco research](#)

[Philosophical Theological College](#)

This presentation is just a summary meant to provide you some first and basic information. More details and conditions are specified in the call, available in German and in Italian on the website: <https://www.provincia.bz.it/mobilitycall>.
